

North Kent - Twydall Neighbourhood Action Plan

Pilot project area

Twydall, Chatham, is an area of 1930's housing stock with issues of social exclusion.

Overall goal

The pilot project intends to integrate lessons learnt and experiences from other neighbourhoods in North Kent, and from European partners in the POSEIDON project to work with local people to prepare an action plan for the neighbourhood that will identify and address the key issues and needs as identified by local residents and stakeholders. The project shall primarily address those who are considered to be economically or socially excluded.

Target group

Residents and workers of the Twydall neighbourhood renewal area. This will include all parts of the community, the young, the elderly, those working, and those unemployed.

Steps

The project intends to employ a community development worker who will work with local stakeholders and residents to identify the key issues of the area, then a neighbourhood action plan will be prepared. The key points from the action plan will be delivered to address the key issue. (by North Kent Gateway Partnership)
